Acknowledgement

We are highly indebted to all the persons who have come forward with information and views during interviews, FGD sessions and surveys that were conducted during our research. The enumerators and other members of our research team completed various activities in the field and played vital roles in carrying out our research. We thank them all.

We are also very grateful to Ain o Salish Kendra (ASK) and UNFPA Bangladesh and its officials for having given us the privilege to conduct this research. We would like to specially thank ASK and UNFPA officials who have engaged closely during the research process by providing comments, suggestions and various kinds of support.

The persons or organizations acknowledged above, however, bear no responsibility for any shortcomings of our research or this report.
