Acknowledgement

This study report on Countrywide Downstream (Local) Garment Industry in Bangladesh is the result of a co-operative and mutually supportive working relationship among the study team members of **A Team of Consultants** and **BLF**. It has been accomplished with extensive consultative support from a wide range of people, including my team, and we would like to acknowledge their support.

I gratefully acknowledge the valuable contribution from the team members, specifically Mr. Bayezid Dawla and A M Rokonzaman Khan engaged in conducting the study. The hard work the team has done to complete the study for the Bangladesh Labour Welfare Foundation (BLF) within a period of three months deserves special appreciation.

I would be failing my duty not to thank the Abdus Salam Khan, Chairman, Bangladesh Labour Welfare Foundation (BLF), Mr. ZM Kamrul Aman, Secretary General, BLF and Mr. A.K.M. Ashraf Uddin, Executive Director of the BLF including staff members of different units for their efforts to make the study credible.

I am grateful to FNV for providing support, input and comments.

I would like to express my sincere gratitude to all other staff members for their all-out support during the study, and not least, the workers, factory owners, factory management staff, trade union leaders and the government officials who provided information during the FGDs, and discussions.

Finally, I wish the BLF all the best in its future work with the stakeholders—both women and men and the workers of Bangladesh to develop themselves as defenders of workers' rights with enhanced capabilities to function, act and live with dignity.

A M Rasheduzzaman Khan
Head of the Study Team
